Chair*

Seyfarth's Business Immigration Group presents a powerful and rare combination of capabilities, featuring a 100+-member team located in Atlanta, Boston, Houston, New York, Los Angeles, Washington, DC, and Europe.

We count among our team members high-profile, national immigration thought leaders; technology savvy partners who invest significant time and resources developing sophisticated work production systems and databases that deliver superior immigration management programs to our clients. As a practice we are deeply involved in the American Immigration Lawyers Association and other immigration-centric organizations. Among other noteworthy accolades, in 2016 *The Legal 500* ranked our immigration group as a Tier 1 practice, and within the publication, our client's point out our practice as 'excellent' and 'extremely responsive, competent and efficient', as well as conveying 'a feeling of true partnership.'

We provide comprehensive business immigration services throughout the U.S. and globally, including strategic planning and advice, case preparation, filing and monitoring, as well as development and implementation of corporate policies and training programs. Through our newly developed Immigration Compliance Center (ICC) we cover the challenging regulatory landscape our clients face in terms of I-9 audits, work site raids, E-Verify questions, state-level immigration rules, and related issues.

During the last decade, our group has harnessed the power of document assembly technology and has embraced a Lean Six Sigma-based re-engineering of our major product lines, resulting in high-touch, high-quality immigration services at extremely competitive costs. To our knowledge, this is a singular accomplishment—no competitor has married such substantive expertise with such rigorous, intelligent process methodology.

Our clients enjoy browser-based, real-time access to the status of their business immigration cases on a round-the-clock basis through Seyfarth's case management software ImmSTAR^(R) powered by Tracker^(TM). ImmSTAR also allows for online case initiation and data gathering, providing a seamless and efficient process for client personnel that eliminates data redundancy.

Our professionals work closely with clients on the front-end to develop and deploy innovative business immigration management programs to ensure that client objectives are met on time and under budget. Due to our aggressive use of case management, our document assembly and case delivery technologies, our intelligent staffing philosophy, and our experience in managing visa processes and projecting and budgeting costs, our clients experience a smoothly functioning, well-managed work permit program at competitive cost.

Immigration Alerts

Our team follows the latest immigration developments coming out of the new administration and publishes frequent updates and guidance for clients.
